Note

The examples shown in this user guide are obtained from publicly available navigation documents published by the Federal Aviation Administration of the United States.

1. Overview of 1A1 Tool

1A1 Tool is a software tool to (1) process complex industrial documents, (2) extract information of interest, (3) save the information to the database, (4) detect changes in the information from its last recorded value, and (5) report these changes to the users.

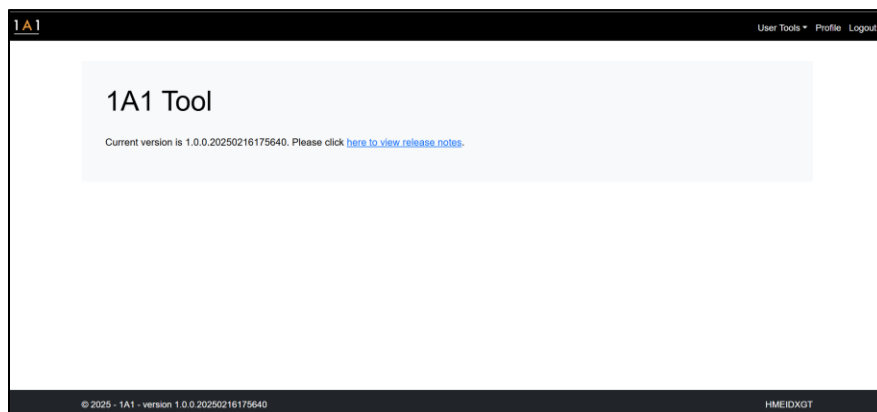

1A1 Tool is designed for five different user roles:

1. **User:** Uploads documents to the system for processing;
2. **Tester:** Performs Accuracy Tests for the system;
3. **Super-User:** Checks user audit logs and document traceability;
4. **Administrator:** Oversees the system, manages user permissions, and generates reports;
5. **Support:** Provides Tier 1, Tier 2 and Tier 3 technical support.

2. User Workflow

A User may access the following options via the menu bar on the 1A1 Tool landing page:

- User Tools
- Profile
- Logout
